Panel system

The next125 panel system is the perfect addition for every kitchen; it establishes order and offers storage space where it is needed. The system is available in all stainless steel or all onyx black colour. Alongside the onyx black back panel, this creates a minimal, architectural look.

To pick up on the trend for black details and ensure a uniform appearance throughout the system, the profiles and CUBES for the panel system are also available in onyx black, as well as stainless steel colour. For optimal kitchen planning, the recess panel can be selected in the same material as the worktop. To make this possible with ceramic and quartz grey worktops, the Systemo panel system is also available in all of these materials.

Panel Garden

with and without lighting

What can be better than using fresh herbs to cook with?

We have developed a solution just for this: The panel garden with integrated lighting helps herbs to remain fresh for longer – this makes particular sense in darker parts of the kitchen. The lighting is controlled by a timer that leaves the light on for 14 hours and then switches it off for 10 hours. Thus, you always have fresh herbs to hand and do not need to visit the market as often. The panel garden is also available without illumination, in the event that the herbs receive sufficient daylight.

Frame

Recess open shelf unit

Not only is the next125 FRAME WALL aluminium recess open shelf unit in onyx black a stylish helper for keeping your kitchen utensils neat and tidy but also a designer-style object for the midway section. It conjures a light, airy look and creates storage space for spices, vinegar, oil and kitchen tools. The back panel of the recess open shelf unit can be finished in laminate, SensiQ, glass, ceramic and quartz without lighting or with the Emotion LED illuminated bands.

The back panel graining is always horizontal. The white acrylic glass back-lighting throughout surface makes the open shelf unit a particular highlight. Various organiser elements can be fitted in the shelf compartments to keep everything in the kitchen at arm's reach.

Frame

Wall & Rack

FRAME WALL

Stunning storage space - the next125 Frame Wall with a structural frame made of onyx black aluminium adds a personal touch to the kitchen and makes perfect use of storage space in the recess and on the wall. With its custom features it offers space for both ornaments and practical items. For those who like ambience, the lighting option lends a special atmosphere.

FRAME RACK

Whether in the kitchen or as a standalone piece, with its elegant onyx black frame, the Frame Rack always makes a statement and gives the kitchen an airy feel thanks to its minimalist look. It keeps everything neat and tidy and is a great showcase for selected items. Additional lighting can be used to create a pleasant ambience.

FLEX-BOX insert, mottled anthracite moulded nonwoven material

7 items made of moulded nonwoven material:

- cutlery insert
- cooking utensil insert
- knife block insert
- FLEX-BOX 6
- FLEX-BOX 3
- lid for FLEX-BOX 3
- insert for plate rack

They are made from a combination of polyester fibres. The special production method results in a firm shape with a soft feel and sound-absorbing effect. The material can be cleaned with normal household cleaning products. We recommend a manual cleaning under lukewarm, running water and subsequent air drying.

Anti-slip mat, mottled anthracite moulded nonwoven material

The anti-slip mats are made of the same material as the FLEX-BOXES in mottled anthracite moulded nonwoven material. All widths are available in a carcass depth of 56 cm. The 66 cm carcass depth is formed in a combination with depth adjustment cutlery insert ZPB..10EI.

Anti-slip mats are also available for the pull-outs in the sideboard open shelf base unit in widths of 45 and 60 cm. All other dimensions can be produced by cutting to size on site.

Functional insert for drawer

Depending on width, the high-quality cutlery inserts in natural oak can be upgraded with functional inserts. The following functions are available for this purpose:

- knife block insert
- chopping board with 2 trivets for pans
- insert for kitchen rolls
- napkin rings
- small china bowls
- spice containers

FLEX-BOX set 5 for drawers

With FLEX-BOX set FBSS5, drawers can be configured for cutlery and various kitchen utensils. The four FLEX-BOXES FB6 completely fill out the depth of the drawer. Width-wise, the 4 boxes can be pushed into each other or pulled apart on telescopic form. The vacant spaces that are produced can then be used for storing utensils.

**Anti-slip mat**

All front and internal drawers, front and internal pull-outs, carousel shelves in corner base units and wood shelves with metal band in tiered pull-out larder units and pull-out base units are equipped with basalt grey anti-slip mats.

**Laminate cutlery insert for low drawer frame**

Special low cutlery inserts with a carcass depth of 46 cm are available for the shallow drawers under induction hobs. These inserts are of the same design as the taller cutlery inserts.

Laminate cutlery insert

Laminate cutlery insert, basalt grey. Compartments arranged at right angles to the direction of pulling and deep trays ensure large capacity and greater stability, in combination with the 3 mm thick material. Available for all required widths in carcass depths of 46, 56 and 66 cm.

**Partition frame 10 and 20 cm, metal basalt grey**

The metal partitioning frames are available in widths of 10 cm and 20 cm and are designed for the carcass depth 56 cm. These can be positioned freely and each have one adjustable movable wall. The free remaining areas can be used for cooking utensils or for further interior organisers.

**Pantry-Box**

A pull-out in a width of 60 cm and depth of 56 cm can be fitted with the pantry box. It is used for storing food requiring no cooling, such as fruit and vegetables.

The white pantry box has a removable plastic grid and a separate plastic insert with handle, making all elements easy to clean. Food items are hygienically covered by a toughened sliding glass cover while still keeping them visible.

All-purpose electrical slicer for drawer, silver-coloured

Slices bread, ham, cold cuts and vegetables. Variable slice thickness up to 14 mm. mounting into standard drawers for unit widths 45, 50 and 60 cm in series NXP and for unit widths 50 and 60 cm in series NXL. Worktops in 1,6cm thickness cannot be used on units in 60 cm width for NXP. **Not available for UK.**

FLEX-BOX, mottled anthracite moulded nonwoven material for pull-outs

The moulded nonwoven plate racks perform exceptionally well with their soft material that keeps plates securely in place and prevents them from clattering. The plate racks are also ideal for combining with the perforated baseboards with separation elements or perforated baseboard with rods. There are available the form of sets.

FLEX-BOX, mottled anthracite moulded nonwoven material for pull-outs

FLEX-BOX 3 in moulded nonwoven material combines well with the FLEX-BOXES in oak. Lids are also available for this FLEX-BOX in moulded nonwoven material.

SpaceFlexx - versatile organisational system for storage containers

The SpaceFlexx organisation system provides optimised organisation in the base unit - storage containers cannot tip over and fall out. Regardless of shape and size, items stored can be intuitively placed and arranged between the dividers. You instantly find whatever you need. The sturdy frame with the freely adjustable dividing bands made of flexible fabric is even machine-washable. SpaceFlexx can be fitted in a carcass depth of 56 cm and from widths of 60 cm.

Partition frame for pull-out

We offer two partition frames in basalt grey for carcass depths 46, 56 and 66 cm for next125 pull-outs. These frames are magnetic on one narrow side, so they can be attached to the back panel, to the frames or each other. The standard includes an adjustable partition wall in laminate basalt grey.

Flex-Box

Efficiency in a kitchen depends on two things: planning and equipment. When daily workflows determine the arrangement of the furnishings and ergonomic aspects are incorporated into the design, that's when you get furnishings with the greatest functionality.

An example of this is the Flex-Box system; made of natural oak or moulded non-woven material, this helps keep pull-outs and wall units in order. The practical, real wood Flex-Boxes look great and keep cupboards neat and tidy. Precisely cut to the dimensions of next125 cabinets, they're extremely versatile and flexible. Stackable and movable, they accommodate even the smallest items. Flex-Boxes are also welcome helpers for ordering and grouping items in wall units or tall units. And design enthusiasts will love them too as the equally intelligent and elegant system remains true to the next125 philosophy: form follows function.

Flex-Box

Mottled nonwoven material

Made from moulded non-woven material, Flex-Boxes are an elegant solution for drawers and pull-outs. The soft material is pleasant to the touch and cushions the noise of cutlery, kitchen utensils and china. The seven different inserts can be combined as desired for unique interior organisation: cutlery insert, insert for cooking utensils, knife-block insert, small non-woven box, large non-woven box, lid for large non-woven box, plate holder and additional insert mats.

The Flex-Boxes made from moulded non-woven material can be optimally combined with the natural oak variants – both versions are size-matched. They're also easy to clean: simply vacuum or wipe (with a damp cloth).

FLEX-BOX | MOTTLED MOULDED NONWOVEN MATERIAL

CARCASE DEPTH 35 / 46 / 56 / 66 CM		DESCRIPTION	ITEMS	WIDTH

Lighting

Whether effect or work lighting, direct or indirect, wonderfully bright or dimmable to set the desired mood: light in living spaces and the kitchen plays a different role for everyone. This makes it all the more perfect that next125 offers the ideal solution for all needs: from pendant luminaires to cabinet interior lighting and LEDs above the work surface.

The ultra-slender next125 pendant luminaire hangs elegantly over the dining table or kitchen island providing perfect lighting. Available in two different colours – Stainless-steel-coloured or Onyx black – its light temperature can be precisely adjusted using the 4-channel wireless controller. The LED shelf and LED mood lighting are optional alternatives. These enable customised shelving to be cleverly highlighted and provide a pleasant indirect light source that makes the kitchen feel more homely.

HIGHLIGHTS

The Trolley

An all-rounder

The next125 Trolley is a multifunctional kitchen helper for the cooking zone as well as the dining and living area – and makes a real eye-catcher too. With its colour combination of onyx black and matching accessories in natural oak, it gives the kitchen an elegant touch. It fits perfectly under the next125 Cooking table or can stand in a recess in a row of units where it saves space.

The mobile piece of furniture provides plenty of storage space as well as a work and preparation surface. With its soft swivelling casters and the onyx black handle, it can be moved with effortless ease and also used as a serving or bar trolley. The trolley can be ordered without fittings or with two defined sets of fittings.

	DESCRIPTION	ITEMS	WIDTH

The Pocketsystem

Where to put the kitchen when you don't want to see it, at home or in the office? The idea: the pocketsystem. It not only hides the kitchen, but is also an architectural eye-catcher in the room. The retractable doors open by tapping and disappear sideways into the carcass when pushed slightly.

How it is equipped, is up to its own requirements. The beauty of this is that the interior can be used to create color contrasts with the exterior, for example, with a restrained exterior and a colorful interior, just as you like it. The pocketsystem can be ideally supplemented on both sides with other tall cabinets.

The bar partition

NEW

Many dream of having their very own bar at home. The bar section for the next125 pocket system makes this dream come true.

This new twist on the drinks cabinet has a few surprises in store: with two filigree frame recess shelves made of anodised, onyx black aluminium, a matt velvet lacquered support panel shelf and aluminium wall shelves of the same colour with dimmable lighting, the recess is transformed into an elegant home bar. The mirrored back panel showcases precious objects, providing a sense of depth and just the right amount of grandeur. The interior units can be individually designed. Thanks to the predefined widths, the bar section inside the unit can also be combined with tall units for refrigeration appliances or wine coolers so that your drinks and fine wines are always stored at the perfect temperature.

Table and bench

Contemporary kitchen architecture more and more includes the entire room. The cooking and eating areas increasingly merge into an adventure- and consumption unit in which the design of the environment is an important element. The collection next125 table and bench has been developed in order to create a harmonious overall picture in which people like to stay.

The set consists of a solid wood table and a bench in natural knotty oak and natural walnut. This table and bench add a beautiful touch to the next125 interior range.

Frames for support panel material

When you just want to sit down, chat and stay as long as you like, there's nowhere homelier than the kitchen. To create a smooth, harmonious transition from the kitchen to the living room, we've designed the table and bench frame for the next125 support panels.

The table frame with its unique geometry adds a special touch to its surroundings and comes in the same design as the bench frame. To guarantee as much individuality as possible, the overlaid boards are available in a selection of materials and colours from the next125 range. The frames come in a stainless-steel-coloured or onyx black finish.

Sideboard

Quality characteristics

How do you create a stylish connection between kitchen, dining room and living room? Our answer: the multifunctional next125 sideboards. Thanks to the range of base versions, you can create your very own dream combination and tailor the sideboard to your kitchen design. Clear, pure, aesthetic and yet featuring many loving details. For example the lowered tray as a tableau, the push-in shelf or the open shelf base unit with pullouts.

Of course, our sideboards are also available with a fully closed front – offered in 3 heights and 4 widths. A choice of satin lacquer, matt velvet lacquer, laminate SensiQ and veneer finishes is available.

next125 Sideboards

The next125 Sideboards are available in three heights and four widths. They have been designed for the living area close to the kitchen and come complete. They are complemented by different design features - e.g. open shelf unit with shelves or tray finished in satin lacquer, matt velvet lacquer or veneer as well as open shelf unit with pull-outs in natural walnut or natural knotty oak, brushed.

The next125 Sideboards can be combined with the sideboard frame with cabinet legs or with the 2 cm high plinth feet.

next125 Sideboards

Complementing our next125 Glass display unit, we are extending our range with a further piece of versatile standalone furniture.

The concealed hinge system, the delicate glass door in glass gloss ultragrey, the english style pull-outs and the modern handle in onyx black/leather exude a purist look with aesthetic appeal.

Our new next125 Sideboard goes with any surroundings and cuts an impressive figure in any space with its understated elegance. Combinations in natural walnut and natural knotty oak, brushed are available by way of variation.

The sideboard top panel is optionally available in black vegan leather. matching feet and a sideboard frame are available as the base element. This way, our latest piece of furniture fits perfectly into the existing range of materials and colours and can be perfectly integrated into the kitchen and living space.

Optional ambience lighting is integrated in the carcase sides. Dimmable and adjustable light colour let you display your favourite pieces in a particularly stylish way.

Glass display unit

Where should you put your many beautiful things – your fine glasses, collector's items or even just your souvenirs? Our answer: the next12 glass display unit. Consciously designed with a particularly sleek look featuring a subtle frame in onyx black combined with tinted front panes and an extravagant mock-leather handle. The dimmable LED light in the interior consciously and atmospherically presents your favourite pieces as desired.

The integrated drawers and pull-outs are perfect for storing smaller objects. The glass display unit is available as a freestanding version with elegant legs or can sit on a plinth and be integrated into a row of tall units.
